**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, drawn to a solder bonded, classified in class 174, subclass 260.
  - II. Claims 21-23, drawn to a method of providing a modified substrate, classified in class 29, subclass 843.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made without ~~need~~ a step of applying a vacuum such that each of the one or more holes is filed with a solder-coated article.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. A telephone call was made to Stuart Mayer on 7/20/01 to request an oral election to the above restriction requirement, but did not result in an election being made.
